Commercial Subscription Models, Enterprise Tiers, and Billing Terms

1. Tiered Service Level Architecture

Subscription Plan	Cost Structure	Support Access	Core Functional Features
Basic Tier	\$9.99 / Month	Standard Email Tickets Only	Access to standard productivity tools, standard data processing capabilities, and foundational application features.
Premium Tier	\$19.99 / Month	Priority Queue & Live Chat	Automated secure cloud backups, advanced analytics dashboards, high-throughput features, and optimization modules.
Enterprise Tier	Custom Quote-Based Pricing	24/7 Dedicated Account Manager & SLA	Custom API integrations, multi-user team management controls, unlimited compute limits, and dedicated server partitioning.

2. Standard Billing Cycles & Automated Renewals

- Automatic Billing Mechanics:** Subscription fees are billed upfront at the start of each billing period. Subscriptions renew automatically on the monthly anniversary of the initial sign-up date unless the user explicitly pauses or cancels the plan via the billing portal at least 24 hours prior to the renewal date.
- Voluntary Cancellations:** Upon cancellation, the current account tier remains functional until the conclusion of the paid monthly cycle, after which data storage limits drop back to baseline free capacities.

3. Institutional Rebates & Incentive Discounts

- **Annual Term Commitments:** Users choosing an annual prepaid commitment instead of monthly cycles automatically receive a flat 15% discount applied across the total annualized price structure.
- **Academic and Research Allowances:** Registered educational institutions, accredited universities, and non-profit research teams are eligible to submit a waiver form to qualify for specialized academic pricing structures, subject to academic domain verification.
