Classification: Public External

Corporate Returns, Refunds, and Exchange Regulations

1. General Refund Eligibility Framework

- **The 30-Day Window Protocol:** Customers have a strict legal allowance of 30 calendar days from the documented carrier delivery date to initiate a formal return or refund request.
- **Physical Return Standards:** For a return to pass physical validation, items must be returned in their pristine original physical condition, enclosed inside the original factory box, and complete with all accessories, cables, documentation, and protective internal packaging.

2. Non-Refundable Items & Category Exclusions

- **Strict Digital and Special Restrictions:** The following items are categorically excluded from standard returns and are completely non-refundable once acquired: downloaded or activated software licenses, gift card items, customized hardware configurations, and clearance/liquidation items sold "as-is". The only exception is if a system diagnostic proves the software binary or asset arrived natively corrupted or defective.

3. Processing Lifecycles & Timelines

- **Inspection Window:** Once returned assets physically reach our fulfillment depot, they must undergo technical testing to verify serial numbers and functionality.
- **Financial Disbursal:** Upon passing validation, refunds are processed and sent to the customer's original payment method (credit card, bank account, or digital wallet) within 5 to 7 business days. TechMart cannot modify payment destinations due to anti-money laundering regulations.

4. Special Scenarios: Transit Damage & Exchanges

- **Arrived Damaged Protocol:** If a logistics carrier delivers a damaged package, the customer must submit a report within 48 hours of delivery. Submissions must include photographic evidence of both the outer transit box and internal product damage to fast-track an expedited shipping replacement or complete credit card refund.

- **Product Exchange Procedures:** Eligible items can be exchanged for different models. The customer will either be invoiced for the upward cost difference or issued a partial store credit/refund if exchanging down to a lower-priced model.
